If you'd like to request a feature for Bit2Music Musicoin Playlist, content must actually go live on the requested date. The Bit2Music Musicoin genre pages always refresh on Fridays. All distributors submit their feature requests three weeks in advance of each Friday. One way around wanting a release live immediately is to have a pre-order. These can go live within 48 - 72 hours after we receive all assets. Consumers may purchase and preview but not actually download the track or tracks until the release date. 1-3 tracks may also be selected as instant gratification tracks where the consumer will get those immediately prior to release date.

If the feature date on iTunes is something you're not interested in waiting for, we can get music live within 5-7 days or you may choose a Friday release day in any upcoming week and be featured in our NMF blast. For UBI Distribution that pay more, and many other promotion options provided here: https://bit2musictoken.club/contact.html

Once your sales/royalties reach a balance of $100+ USD, we will reach out for payment information. You may also request payment after 2 months if you do not meet this threshold. We pay out balances using either PayPal or direct wire transfer.
